TERRIBLE WEATHER IN THE NORTHWEST.—The Chicago Journal, of the 11th inst., says:

A gentleman who reached Galena on Wednesday, from Mineral Point, describes the traveling as dangerous. ## KENTUCKY CORN AND COB MILL.

**I**t is well known that there is great economy in crushing or grinding the kernels of all grain before feeding it to stock, and that there is much instrument in the cob when properly broken or ground. And the only reason which has arraigned us is that we have sold recently not been more generally introduced among planters and farmers, has been their complex arrangement and high cost.

In our Kentucky Corn and Cob Mill, of which the above is a more accurate engraving, we claim to have produced a machine at once efficient, substantial and cheap, while its arrangement is so simple that the most ordinary hand can adjust and operate it. This machine will, by any other, is regulated by means of a single set of valves, which is easily done, and is applied directly under the centre of the mill.

Any one using these Mills will find a clear saving of one quarter of their corn over the old plan of feeding. We have now a number of them in operation. Purchasers may obtain them for day and if not satisfied, can return them and get their money.

They will grind Corn and Cob as desired, at the following rate per hour, with one horse:

\$0.4 to \$0.6 bushels per hour. Weight 100 lbs. Price \$30.00. Adding freight from Louisville.

The above prices includes the complete Mill ready to turn to without any further expense, and can be set in operation in five minutes time. For sale by
